Pipes and Fittings Five Layers

Respect the Water

History Of The Company:

NBEC Industrial Group was established in 1980 in Mahmoud Abad Industrial Zone of Isfahan, Iran, with the aim of producing various types of automobile and non-automotive metal fittings and parts by a group of craftsmen and specialists. This industrial complex, which operates in an area of 10,000 square meters with 150 human resources, has from the very beginning, innovation and creativity in creating a new and efficient product as part of its policy. This thinking and vision caused him to achieve many honors in a short time, some of which are: 1- The first manufacturer of forged molds for gas valves in Iran 2- The first manufacturer of complex parts of Peugeot car 3- The first manufacturer of brass fittings Five-layer pipes in Iran and

In 2001, with the arrival of five-layer pipes in Iran, and application in the installation and plumbing industry of the country in the form of a development plan, the relevant products were produced and by providing major parts of the needs of five-layer pipe factories were able to Become one of the greatest activists in this field. This industrial complex in 2010 and simultaneously with the development of the national standard of these products has presented all its experiences and technical and engineering research during these years in the form of a plan to develop the national standard to the National Standard Organization of Iran.

This issue has taken a big step towards achieving the quality goals of the collection and eliminating low quality domestic and foreign products from the market. "Also, years of experience in the industry, the history of the complex and the use of experienced and specialized engineers in the design unit made the company's products with the ability to connect to all standard five-layer pipes, a subject that some consumers of these products for years." Had many problems with the production of these products has been completely eliminated.

Currently, **NBEC** brand is one of the most popular brands in the industry of installations and water supply systems, and the products of this company are: 1- PEX-AL-PEX five-layer pipes suitable for cold and hot water 2- Brass press fittings 3 - Coupling brass fittings 4-Water valves

This collection is proud to produce and supply all its products in accordance with international standards.

Standards: ASTM F1281, ASTM F1282, ASTM F1335-ISO 15876-2, ISO 15875-2, ISO 10508, EN 806-1, ISO 9080, ISO21003-3, EN 10088-1, EN 1254-3, EN 10226-1 , EN 681-1,2
